

AAU Megaproject – Blue Denmark

Ports and Coastal Areas – Biodiversity in the Limfjord

Biodiversity of The Limfjord – discussion of the values of nature and culture respectively as based on an anthropocentric and biocentric value focus

- Investigation of the moral burden of responsibility in relation to investigating the actual responsibility of companies towards such social and societal problem areas (CSR), which, for example, sustainable development can be claimed to be
- The ten basic principles for Corporate Social Responsibility were included and applied in the case study of The Port of Aalborg
- The project activities ran in parallel with three general meetings and an excursion and discussion involving The Port of Aalborg and a visit to Salicornia platforms at the Limfjord established as part of the Megaproject activity
